

CY 2022 Medicare Physician Fee Schedule Proposed Rule

Major Provisions

On July 13, the Centers for Medicare & Medicaid Services (CMS) released a proposed rule for the 2022 Medicare Physician Fee Schedule (MPFS): <https://www.govinfo.gov/content/pkg/FR-2021-07-23/pdf/2021-14973.pdf>. Comments are due no later than September 13, 2021. We anticipate that the final rule will be published in early November 2021 and will become effective for services provided starting on January 1, 2022.

This document provides NAEC Members with a summary of the major provisions of the MPFS proposed rule impacting epilepsy centers, including charts showing physician work relative value units and national average Medicare payment rates for neurophysiology, epilepsy surgery, and evaluation and management (E/M) services.

Proposed Conversion Factor

CMS is proposing a conversion factor (CF) of \$33.58 in CY 2022, which is a decrease of 3.75% from the CY 2021 CF of \$34.89. The conversion factor is used to convert the physician fee schedule relative value units for physician work, practice expense, and malpractice expense into Medicare's payment rates. The decrease in the CF for CY 2022 is due to the fact that Congress mandated a 3.75% increase in the 2021 CF to hold physicians harmless from the required budget neutrality adjustment that was occurring due to the changes in E/M and other services' coding values in 2021.

Proposed Rule's Impact on Neurology, Neurosurgery and E/M Services

Attached to this summary is a specialty impact chart provided by the AMA that reflects the impact on specialties for the provisions in the proposed rule, including the proposed CF reduction. Also, attached are the specialty specific charts prepared by NAEC for Neurology, Neurosurgery and E/M Services.

The CY 2022 PFS proposed rule presents a series of standard technical proposals involving practice expense, including the implementation of the fourth year of the market-based supply and equipment pricing update, changes to the practice expense for many services associated with the proposed update to clinical labor pricing, and standard rate-setting refinements. T

The specialty impact chart is showing an overall decrease in payment for neurology and neurosurgery services of 3.3% and 3.2%, respectively. If Congress acts to restore the 3.75% decrease in the CF the specialties will experience a slight increase due to the rule in CY 2022.

Most neurology and evaluation and management services provided in facility settings are decreasing by 3-5%, largely due to the proposed decrease in the CF. The TC codes reported for

outpatient services are decreasing much more significantly, but many of these services are rarely provided outside the inpatient setting. The changes being made to the labor component of the Practice Expense values is the cause for much of this decrease. CMS is not proposing national RVUs for the technical component codes for long term EEG/VEEG services (95700, 95705-95716) in 2022. This means that local Medicare contractors and private insurers will continue to determine their payment rates for these services.

New CPT Codes for Laser Ablation (LITT) - In October 2020, the CPT Editorial Panel approved the addition of two codes to report laser interstitial thermal therapy (LITT) of lesion, intracranial, including burr hole(s), with magnetic resonance (MR) imaging guidance for a single trajectory for 1 simple lesion 617X1 and multiple trajectories for multiple or complex lesion(s) 617X2. The codes will become effective on January 1, 2022. CMS did not accept the RUC recommended relative values for the new codes and is recommending slightly lower physician work values, specifically 19.06 RVUs for 617X1 and 22.67 RVUs for 617X2. NAEC will collaborate with the neurosurgical societies and submit comments on the new code values and ask that the RUC recommended values be finalized for Medicare services.

Evaluation and Management

Split or Shared Visits

CMS is proposing changes in the reporting of split or shared services, which are services furnished in a facility setting by a physician and an NPP in the same group. CMS is proposing to allow physicians and NPPs to bill for split (or shared) visits for both new and established patients and for critical care and certain Skilled Nursing Facility /Nursing Facility (SNF/NF) E/M visits. CMS is proposing that the provider who performs the substantive portion (more than half of the total time) of the split visit would bill for the visit. The total time for the service would equal the sum of the distinct time spent by each provider. CMS references CPT E/M Guidelines in listing the activities that can count toward total time for purposes of determining the substantive portion. For visits that are not critical care services, CMS is proposing the same listing of activities that can count when time is used to select E/M visit level, regardless of whether direct patient contact is involved.

Critical Care Services

CMS is proposing to allow that more than one provider can furnish critical care services using the split/shared services rules as described above. CMS is also proposing that no other E/M service may be provided on the same day as the critical care service to the same patient and that critical care visits cannot be reported during the same time period as a procedure with a global surgical period.

Teaching Physicians Reporting of E/M Services

CMS is proposing that when total time is used to determine the office/outpatient E/M visit level, the time that the teaching physician is present can be included in determining what level

code to report. After the COVID-19 PHE, CMS proposes that teaching physician presence requirements can be met through audio/video real-time communication technology only in residency training sites located outside of metropolitan statistical areas (MSAs) and must otherwise be in-person. While the PHE is in effect the time of the teaching physician when they are present through audio/video real-time communications technology may also be included in the total time considered for visit level selection.

Direct Supervision Requirements

CMS is soliciting comment on whether the temporary flexibility during the PHE for direct supervision requirements to be met through virtual presence using real-time audio/visual technology should be further extended or be made permanent.

Telehealth

During the COVID-19 public health emergency (PHE) CMS has waived the geographic and site of service originating site restrictions for Medicare telehealth services, allowing Medicare beneficiaries to receive care from their homes. These flexibilities remain in effect as the PHE declaration is in place, which is expected to continue through CY 2021. CMS does not propose to permanently waive these restrictions in the MPFS because the agency states that it lacks authority to make this adjustment. Without this change in requirements, physicians will not be able to use the office/outpatient E/M codes to provide telehealth services to patients in their homes beyond the PHE. CMS does make an exception to this rule for the diagnosis, evaluation and treatment of a patient with a mental health disorder and will allow for audio-only telehealth mental health services.

In last year's final rule, CMS referred to three different categories for telehealth codes: Category 1, which represents services that are similar to professional consultation, office visits, and office psychiatry services that are currently on the Medicare telehealth services list, Category 2, which includes services that are not similar to those on the current Medicare telehealth services list, and a new Category 3 to represent services added to the telehealth list on a temporary basis, where CMS is interested in gathering data and additional information on whether these should be made permanent. In this rule, CMS is proposing to allow the services temporarily added to the telehealth services list in the CY2021 MPFS to remain on the list through Dec. 31, 2023. This will enable CMS to collect data to determine whether services should be permanently added to the telehealth list following the COVID-19 PHE.

Virtual Check-In Service – CMS is proposing to permanently adopt coding and payment for HCPCS code G2252 (brief communication technology-based service, such as virtual check-in service) as described in the CY 2021 PFS final rule. The service can be provided by any form of telehealth communication technology, including audio-only.

Medicare Part B Drugs

CMS is proposing to require drug manufacturers to report each quarter's average sales price (ASP) data for all national drug codes (NDCs) under the same U.S. Food and Drug Administration approval application for Part B drugs regardless of whether they have Medicaid drug rebate agreements. CMS proposes to include any item, service, supply or product payable under Part B as a drug or biological in existing drug pricing reporting requirements and will include drug repackagers in this requirement. Prior to this rule only manufacturers with Medicaid agreements had to report this data to CMS.

E-Prescribing for Part D Drugs

Due to the pandemic, CMS is proposing to delay the e-prescribing compliance date from Jan. 1, 2022, to Jan. 1, 2023. Violators will receive a letter from CMS asking why they are not in compliance. At this time, CMS is not proposing payment penalties but will reevaluate in future rulemaking. CMS also proposes to extend the compliance deadline for Part D controlled substance prescriptions written for beneficiaries in long-term care facilities (excluding residents of nursing facilities covered under Part A) from Jan. 1, 2022, to Jan. 1, 2025.

Physician Assistant (PA) Services

By law, effective Jan. 1, 2022, PAs are authorized to bill the Medicare program and be paid directly for their services, including incident to services. They may also reassign their billing rights and choose to incorporate as a group comprised solely of practitioners in their specialty and bill the Medicare program, as nurse practitioners do. CMS is proposing to implement these policies in this rule.

Open Payments Program and Physician Self-Referral Law

CMS additionally proposes changes in these two important areas. First, CMS provides details on data reporting requirements related to the Open Payments Program which publicly posts information about the financial relationships between the pharmaceutical and medical device industry and providers. More information can be found at pages 39333-39337 of the proposed rule on the Open Payment Program. Second, CMS updates the Physician Self-Referral Law, also known as the "Stark Law," which restricts a physician from making referrals to an entity for certain healthcare services if the physician has a financial relationship with the entity. More information on the Physician Self-Referral Law is provided on pages 39319-39326 of the proposed rule.

Combined Impact of Proposed Rule and Conversion Factor Reduction for 2022
